CLASS II

Armor Gard™ HIGH-PERFORMANCE CHAFE PROTECTION

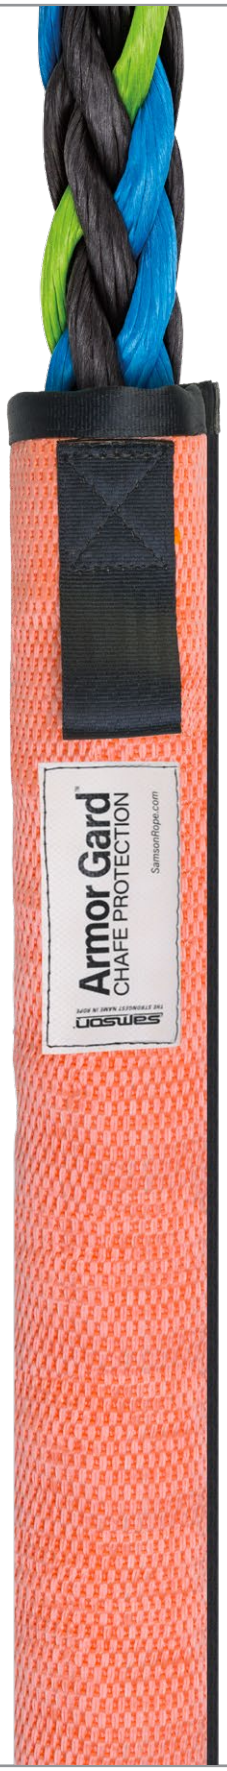

Armor Gard™ is a woven High Modulus Polyethylene (HMPE) abrasion protection sleeve designed to help extend the service life of synthetic mooring ropes in high-wear applications. Constructed from HMPE fibers and Samson's best-in-class Armor™ coating technology, Armor Gard provides exceptional resistance to abrasion and chafe at critical rope contact points. The braided sleeve design incorporates a hook-and-loop closure system, allowing for quick installation on existing mooring lines without rope resplicing or manufacturer technician support. Armor Gard can be installed directly on the rope body or over spliced areas, providing flexible protection where wear is most likely.

Engineered for demanding marine environments, Armor Gard delivers a high level of abrasion protection comparable to leading HMPE chafe protection solutions while providing the convenience of field installation and replacement.

PRODUCT CODE: 906

FIBER: HMPE

COLOR: Orange and Black

FEATURES:

- HMPE woven construction
- Outperforms leading chafe protection solutions
- Hook-and-loop closure
- No resplicing required
- Fits rope body and spliced areas
- Field-installable design
- High-visibility wear indicator

Armor Gard can be installed directly onto the rope body or over spliced areas. The braided sleeve incorporates a hook-and-loop closure system, allowing for quick installation on existing mooring lines while in the field.
