

Chafe-Pro® FS HIGH-PERFORMANCE CHAFE PROTECTION

Chafe-Pro® FS provides critical protection for high-performance mooring lines. Custom designed for Samson, Chafe-Pro FS has a free-sliding fit and can be easily installed before or after the lines are deployed. Built to last, it has multiple layers of specially-formulated, heavy-duty nylon and extremely durable thread providing maximum flexibility and durability. Should significant wear occur, the Safety Yellow inside lining provides a visual indicator to inspect your lines. Chafe-Pro FS is easily positioned wherever lines pass through chocks or across fairleads anywhere they may be subject to abrasion. A simple hook-and-loop closure allows the Chafe-Pro FS sleeve to be quickly installed or repositioned where needed. There are attachment points at both ends for tag lines to keep the sleeve in position.

PRODUCT CODE: 970

FIBER: Nylon

COLOR: Black & Safety Yellow

FEATURES:

- > Ease of installation and removal, no lacing or lashing required
- > Highly resistant to abrasion
- > Resistant to UV damage
- > Highly flexible
- > High-visibility wear indicator
