

H-Link Adapter

PRODUCT CODE: 962

The H-Link Adapter is specifically designed for use with high-performance, high-modulus synthetic ropes terminated with a spliced eye and Blue Line Thimble. The open clevis on the rope side is sized to easily accommodate the 3/4" Blue Line Thimble. The opposite end is sized to match typical open clevis dimensions for wedge sockets utilized with steel-wire rope of similar strength. These parts are marked with a stamped WLL on the part, based on a 5x design factor, which follows with requirements for shackles in the ASME B30.26 – *Rigging Hardware* safety standard. The assembly includes the clevis link, pins, safety nuts, and cotter pins.
